# QBSW Company profile

Since 2000, QBSW has been bringing quality software solutions for both public and private organizations. We rank between the fastest growing and highest added-value IT companies in Slovakia\*. We burst with priceless know-how on development of financial and other information systems in Slovakia and abroad.

## Solutions and Services

We specialize on development of complex IS solutions in the range of analysis, design, development, delivery, upgrade, maintenance, and integration. We offer our extensive knowledge and experiences from the fields of software development, financial management solutions and related services, including software application development outsourcing.

Our customers require high quality and reliable

solutions to improve their organizational information processes. We focus mainly on long-term cooperation with customers that are very demanding and have stable market positions.

The QBSW solutions and services are presented in three product groups that complexly cover information needs of modern companies and public organizations:

 <p><b>State Treasury</b> Financial Management Solutions</p>	<b>QBSW Financial Management Solutions</b> Software solutions for public finance optimization, support of financial policy targets, and minimization of debt service cost.
 <p><b>QBSW Outsourcing</b> Software Development Outsourcing</p>	<b>QBSW Outsourcing Services</b> Outsourcing of IS development, maintenance, management and support, outsourcing of expert assistance and IT consultancy services.
 <p><b>QBSW Custom Development</b> Professional Information Systems Solutions</p>	<b>QBSW Custom Development Solutions</b> Development of new information systems according to customer's requirements, and activities complexly covering the whole information system life-cycle.

## Company profile

QBSW has the potential to become a notable European technological company that is able to produce very complex and extensive information systems. We consider a strong competitive advantage our exceptional know-how on developing state and public Financial Management Systems, the products that outreach regional character. This is a good base to expand our successful cooperation with our current and future partners.

### Quality Management System

One of the most important fundamentals of our activities is a system of quality work, which is the most important criterion of our customers' satisfaction reached by delivery of mistake-free products.

QBSW has established and maintains the Quality Management System according to the ISO 9001:2000 norm since 2003. This system has been certified by the Det Norske Veritas (DNV) certification authority, and relates to the areas of analysis, design, development, delivery, upgrade, maintenance, and integration of information systems and their parts based on clients' requirements.

### References and partners

We have realized several extensive information systems and thousands of smaller projects since our foundation. We have gained trust of numerous public and state organizations and many important private companies from the following sectors: Finance, Banking and Insurance, Telecommunications, Information Systems and Transport.

#### Our most important references:
